PROFESSIONAL SUMMARY

Accomplished Technical Lead and Senior Full-Stack Engineer with over 9 years of experience architecting highly scalable, service-oriented distributed systems utilizing JavaScript, Node.js, TypeScript, React.js and Angular. Proven track record of leading development teams in agile environments, spearheading end-to-end enterprise web projects, processing big data in distributed environments, and executing seamless system migrations that deliver up to 40% in operational cost savings. A highly collaborative leader responsible for team Scaling, Performance, & Quality, adept at driving technology choices, defining project scope with stakeholders, establishing engineering best practices, and troubleshooting complex technical issues to deliver highly available, secure solutions.

SKILLS

- **Languages & Frameworks:** Node.js, JavaScript, TypeScript, Express.js, Nest.js, Angular, React.js, GraphQL, RxJS, RESTful APIs
- **Architecture & Cloud:** Microservices, Service-Oriented Architecture (SOA), Distributed Systems, Event-Driven Architectures, Micro-frontends, Frontend & Backend Principles, System Design (HLD/LLD), Multi-Tenancy, Single-SPA, Monorepo
- **Databases & Messaging:** MySQL, PostgreSQL, MongoDB, Redis, RabbitMQ, Kafka
- **Tools & DevOps:** Docker, Kubernetes, AWS, Jenkins, CI/CD Pipelines, Git/GitHub Source Control
- **Testing & Automation:** Playwright, Jest, Test-Driven Development (TDD), Claude, MCP
- **Methodologies & Leadership:** Agile Environment, Sprint Planning & Task Estimation, User Story Creation, Technical Strategy, Code & Design Reviews, Stakeholder Management, Mentorship

WORK EXPERIENCE

HCL Tech (Client: Emirates NBD)

Technical Lead

May 2024 – Present

- Architected a Node.js/TypeScript orchestration framework, driving CI/CD automation and process improvements that resolved complex issues and reduced development effort by 55%.
- Led complex feature design for migrating a core Credit Card app to a Node.js distributed system with real-time streaming pipelines, reducing operational costs by 40% and increasing efficiency by 30%.
- Engineered an E2E testing suite via Playwright, Claude (MCP), and GitHub source control, improving QA processes to reduce manual testing by 75% and accelerate releases.
- Defined project scope and timelines with stakeholders, driving technology choices and leading architecture reviews to guarantee system Scaling, Performance, & Quality.

MatchLog Solutions Private Limited, Bengaluru

Senior Software Engineer

Apr 2021 – May 2024

- Designed real-time logistics solutions (TMS, TRI, CASA) by writing highly testable and scalable code using Jest, driving a 30% improvement in fleet utilization.
- Architected a Node.js/React.js platform seamlessly integrating frontend elements with complex server-side logic, supporting 100,000+ monthly operations for STinder via offline batching.
- Directed end-to-end delivery of web projects via sprint planning, accurate task estimation, and user story creation, ensuring timely completion and mitigating empty runs by 40%.
- Engineered reusable frontend components and optimized Node.js backends (RxJS/TypeScript) through successful collaboration, decreasing development workload by 50%.

- Developed high-quality micro-frontend applications (single-spa), enhancing maintainability and reducing enterprise page load times by 35%.
- Configured Jenkins CI/CD pipelines and GitHub source control to automate Docker/Kubernetes deployments, accelerating release cycles by 40%.
- Mentored 5+ web developers in an agile environment, establishing best practices via rigorous code reviews and architecture discussions to improve technology use.

Shiplyst Systems Private Limited, Bengaluru

Software Engineer (Grade 2)

Aug 2019 – Mar 2021

- Automated background processes for third-party APIs via asynchronous programming, reducing data processing time by 50%.
- Designed a high-performance search matching algorithm, improving UX and reducing API response latency by 45%.
- Developed globally reusable Angular UI components and validators, accelerating feature delivery across agile teams by 30%.
- Upheld software quality via Test-Driven Development (TDD), ensuring a 99.9% defect-free status for major production releases.

Canvas Digital, Bengaluru

Full Stack Developer

Nov 2018 – Aug 2019

- Developed a full-stack appointment booking engine with e-commerce RESTful APIs, driving a 25% increase in online bookings.
- Engineered a marketplace bidding portal, optimizing the backend to seamlessly handle 10,000+ concurrent users.

Intecons Software Lab, Bengaluru

Programmer Scale-1

Jan 2017 – Jan 2018

- Engineered a real-time WebSockets chat application, facilitating high-quality calls for 5,000+ active users.
- Integrated mapping/autocomplete APIs for advanced real-time data features, improving user engagement by 20%.

EDUCATION

Master of Computer Applications (MCA)

National Institute of Technology (NIT), Jamshedpur

Bachelor of Computer Applications (BCA)

Swami Vivekanand Subharti University, Prayagraj
